Professional Summary

Senior Software Engineer with 10+ years of experience designing scalable backend systems, APIs, microservices, and data pipelines. Proven track record architecting cloud-native platforms and integrating complex financial and travel technology systems.

Technical Skills

- **Languages:** Python, C/C++, PHP, JavaScript
- **Frontend:** React, Vue, Angular
- **Backend:** Django, Flask, FastAPI, Laravel, REST, GraphQL, gRPC, SOAP
- **Dev Tools:** Git, Elasticsearch, Docker, Jenkins, Ansible, ELK stack, Terraform, Pulumi, ArcGIS, RudderStack, Datadog
- **AWS Cloud:** S3, EC2, VPC, RDS, Route 53, ECS, ECR, Secrets, Glue, DynamoDB, Lambda, Athena, ELB, CDN, SNS, SQS
- **GCP Cloud:** Compute Engine, Cloud Storage, BigQuery, Cloud Run
- **Testing:** Pytest, Unit Test, Integration Test, Postman
- **Project Tools:** Jira, ClickUp, Notion, Zenhub, VSCode, Claude Code, Cursor
- **AI & GenAI:** LLMs, RAG, Prompt Engineering, Embeddings, Vector Search, Semantic Search, OpenAI API
- **Databases & Dataplatforms:** PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Spark, Iceberg, Hadoop, Impala

Professional Experiences

- **Senior Software Engineer – Octus** (Apr 2023 - Present)
 - Spearheading the enhancement of a SaaS platform focused on real-time data and credit analysis. Leveraging Django and Laravel frameworks and smoothing the deployment within the AWS ecosystem. Led the seamless integration of diverse financial data sources and facilitated the development of a robust ETL pipeline to ensure scalability and maintain accurate information across all data sources.
Tech Stack: Python, Django, Jenkins, Laravel, Terraform, Vue, REST, AWS, MySQL, Elasticsearch, Jira, Postman.
- **Staff Engineer – Safara (formerly, Skipper)** (Sep 2021 - Apr 2023)
 - Architected a large and extensible serverless Microservices - Booking Engine from scratch, using FastAPI Framework with gRPC protocol in AWS ECS Clusters-Fargate and outbound through REST & SOAP protocol. Also, built a Content Management System using Django, requesting through GraphQL with a Batch ETL process focusing Low Latency CDN and frequent Deployments through IAC tools, e.g., Terraform, Ansible entirely in AWS infrastructure.
Tech Stack: Python, Django, Docker, FastAPI, Jenkins, Terraform, Microservices, React, gRPC, GraphQL, AWS, PostgreSQL, Linux, JavaScript, Redis, Postman, ClickUp, ArcGIS.
- **Senior Software Developer – Bank of America** (Dec 2018 - Sep 2021)
 - Designed and developed scalable backend APIs using Python and Flask, integrating MySQL, PostgreSQL, and MongoDB data stores. Created a responsive web page with Angular and built CI/CD pipeline using Jenkins deployed on AWS cloud. Implemented application monitoring and centralized logging using the ELK Stack, aggregating application, Nginx, system, and error logs to improve production troubleshooting. Created and maintained API specifications using Swagger/OpenAPI and developed functional and API tests using Pytest.
Tech Stack: Python, AWS, Flask, PySpark, REST, Vue, PostgreSQL, NoSQL, ETL, AngularJS, Django, Elasticsearch, Ansible, MongoDB, Microservices, Docker, ELK.
- **Software Developer – ReformedTech** (Sep 2014 - Dec 2018)
 - Designed and developed multiple projects components using Django & Flask framework using MongoDB and RDBMS. Integrated third-party API with ETL processing and built several microservices, and UI Dashboards for Customers and Administrators. Identified bottlenecks and optimized performance using Elastic Search Indexing.
Tech Stack: PHP, MySQL, Linux, MongoDB, AWS, ETL, Node.js, Microservices, NoSQL, Vue, Jenkins, Elastic Search, Jira.

Education

Masters in Computer Science.

Graduation: Dec 2018

University of Bridgeport, CT

Notable Personal Project

- **Fully functional stock market website:** Integrated Google Finance API to access real-time stock data using Django. Simulated real stock market workflow & functionality displaying the stock price, user portfolio, transaction history, and receiving orders to buy and sell the stocks. Also implemented Recurrent Neural Network (RNN) to predict stock price.
